

## Immersion + Motivation = Success!

We have a simple goal: to create the best possible conditions for learning a foreign language. The combination of total immersion and a good balance between intensive classes and recreational activities means that your child will rapidly gain more flair and self-confidence in using the language.

An excellent basis will be established for your child's further education at secondary school or in preparation for higher professional education or university studies. Since 1975 the language courses have been provided by CERAN LINGUA, one of Europe's largest language institutes.

### Teaching concept

Our intensive language training enables young people aged 9 to 22 to learn a language and, at the same time, to discover a new culture. The language is spoken both during the classes and during all other activities. The international environment allows your child to learn to use the language in his or her interactions with young people from around the world. The programme is adapted to the age group, and the knowledge level is determined by an online test prior to the language courses and an oral test on location. During the training, a mentor will monitor your child's progress. The knowledge and skills acquired will be assessed at the end of the stay. You will receive a detailed report of this assessment.

Please note: the training programmes are also suitable for young people with dyslexia. Dietary requirements can also be taken into account.

### Languages and locations

Our language training for young people takes place at exciting locations in the summer and during the spring and autumn holidays. Language training is available for the following languages: English, French, German and Dutch. CERAN LINGUA provides language courses at the following locations:

- Belgium: Collège Saint-Roche in Ferrières  
Languages: French, English, Dutch, German
- England: Oakham in Rutland  
Language: English

### Activities and recreation

Learning a language should also be fun! This is why we also devote time each day to sport, culture and art. All activities are supervised at all times. Naturally they take place in the language that is being learned and they focus on using the language in practice.
